

TRUEDGE

THE EDGE YOU WANT. EVERY TIME.

TAKE CONTROL OF YOUR GREENS WITH TRUEDGE.

TruEdge eliminates greens creep that occurs over time due to mowing errors. The TruEdge System enables you to maintain the exact shape of your greens without the hassle of reshaping that leaves unsightly edging or scalping in its wake.

THE TRUEDGE ADVANTAGE

- Eliminates greens creep due to daily mowing errors
- Intuitive display guides the operator
- Quickly mounts to existing greens mowers
- Can be used for a clockwise or counterclockwise cut
- Can be used with or without the grass basket
- Visit cubcadetgolf.com/truedge to learn more

"As a part of daily mowing, TruEdge has allowed us to maintain the size and shape of the greens, preserving the design as Rees Jones intended, and without the need to mark, scalp or edge." – Jeff Miller, Superintendent, The Santaluz Club

Cub Cadet®

TRUEDGE

OPERATING PRINCIPLE

GUIDED BY WIRE

- 1 A quick coupling transmitter is deployed at the green by the operator to energize the wire which has been installed at the greens edge at a depth of 10-12 inches.
- 2 TruEdge detects the energized wire with a sensor bar that is positioned ahead of the cutting reel and near the surface of the turf.
- 3 Based on the detected position of the wire, TruEdge's multi-color display illuminates to indicate to the operator the position of the reel relative to the wire.
- 4 Vertical blue LED's correspond to the edge of the reel, enabling the operator to perform a consistent clean-up pass each time.
